Unloaded Vehicle Weight (UVW): Sometimes referred to as "Dry Weight," UVW means the typical weight of this trailer as built at the factory. The UVW, as used in product literature and other promotional materials, does not include cargo, fresh water, propane options or dealer-installed accessories. Hitch Weight (HW): The hitch weight, as used in product literature and other promotional materials, does not include cargo, fresh water, propane gas, options or dealer-installed accessories. The addition of these types of items will either add to or subtract from the stated hitch weight. It is important for your safety and enjoyment that your tow vehicle be adequately sized and equipped to tow and handle the GVWR of the RV you select. Review weights and ratings of your tow vehicle and consult a competent advisor for questions or advice. Whether you are new to RVing or a veteran, get a feel for the performance of your tow vehicle before heading out on the roadways. When you tow an RV, you must drive differently than when you drive a single vehicle. Practice hooking up, driving, backing up and braking in a safe environment or seek out professional instruction. Starcraft affixes a weight label to each RV which lists weight information for that vehicle. See specifications chart on the respective pages of this brochure.
